OPERATED MECHANICAL SWEEPER HIRE

Bucher Machines | Modern Tech | 24/7 Hire | FORS Gold

Private & Business Hire

We have an extensive fleet of Bucher V65's, benefitting from the latest technology in road sweeping all equipped with high pressure hand lance jet wash, high / low pressure underbody water jet system / gully sucker & higher powered 93kw auxiliary engine to give optimum performance on site.

All **JM Clark** drivers arrive to site in full PPE, holding relevant CSCS / NPORS qualifications. We offer a range of options from pre-construction sweeping, during and after depending on your needs. Sweeping teams work closely with construction managers to schedule operations that align with each phase of the project.

BUCHER V65 Operated Hire

V65 KEY SPECS

Bucher Machines | Modern Tech | 24/7 Hire | FORS Gold

High pressure hand lance jet wash

Enables the operator to clean and remove stubborn debris.

Overhead gully sucker

Top mounted with 280° of rotary movement, exceptionally good for drain clearance.

Vacuum nozzles

Wide diameter 250mm nozzle trunking, maximising acceleration and allowing larger debris to pass.

Variabrush

The side and wide sweep brushes are adjustable for speed, pressure and positioning allowing us to adapt our sweepers to your specific needs.

1,500-litre steel water tank

For increased productivity, an optional water recirculation system can save up to 900 litres of water per day this allows us to operate on site for longer saving you time and money.

360° Vision

All sweepers are fully equipped with rear view cameras, audible reverse warning and sensors to ensure driver awareness at all times when we are on your site.

High and low pressure water jet system

The spray bar and the sweep gear can be used together for high performance cleaning, beneficial around building sites or road resurfacing projects.

Powascrub

A heavy-duty brush with thick steel tines effectively clears compact, stubborn surface debris.

Versatile powerpack

Can operate in urban environments at a lower rpm, or full power in heavier duty areas to ensure a clean path is left behind. The fully variable engine can be set to lower revs for night-time sweeping reducing the noise levels by half if required.

OPERATED BACK TO BLACK SWEEPER HIRE

High Performance | Superior Suction | 24/7 Hire | FORS Gold

Introducing the most powerful sweeper tech on the market today.

The Bucher V80 range is an essential part of our fleet and makes the toughest of jobs a breeze.

When you book a Back to Black sweeper, you can be confident that the end results will surpass anything that you've used before.

Ideal for projects that require that extra level of attention to detail.

THE **ULTIMATE** ROAD SWEEPER SOLUTION

Development Projects | Highway & Construction works | Local Councils

BACK TO BLACK - MAXPOWA V80

High Performance | Superior Suction | 24/7 Hire | FORS Gold

The Ultimate Powerhouse

In the world of road sweeping technology, the back to black (Bucher V80) sweeper makes light work of any on-site dirt, debris and other waste.

Fitted with high-performance rear suction nozzles, the back to black's large debris hopper allows for longer operation without the need for frequent unloading, increasing the efficiency of cleaning operations, especially on longer routes or large areas.

Latest in technology

- ▶ Top mounted wanderhose
- ▶ Rear suction nozzles
- ▶ Simultaneous sweep
- ▶ Supawash handheld lance
- ▶ Increased hopper capacity
- ▶ Superior suction & sweeping efficiency
- ▶ Advanced safety systems
- ▶ 360° cameras
- ▶ Advanced Water Systems

BITUMEN SPRAYER HIRE

Specialist Contractors | Operated | FORS Gold

AVAILABLE 24/7

Providing reliable protection for road surfaces in all conditions, at any time.

Using our advanced Dope spraying system, we achieve significantly faster breaking times, allowing follow-on works to commence sooner.

BENEFITS

Reduced downtime on site, enabling trucks and paving equipment to access treated surfaces quickly, improving overall efficiency and project turnaround.

VEHICLE RELOCATION SERVICES

Fully Insured | 3.5 Tonnes | 24/7 Hire | FORS Gold

Our Process

Following an online consultation, we carry out a full site assessment to understand the requirements and plan the safest, most efficient removal process. Our specialist vehicle lifters arrive on site at the agreed time, equipped with advanced hydraulic lifting systems and wheel cradles for safe, damage-free removal.

All operatives are fully trained and NPORS qualified in vehicle lifting and handling. Comprehensive Risk Assessments and Method Statements (RAMS) are provided, with full PPE worn at all times to ensure compliance and safety standards are maintained throughout the operation.

Using specialist crane lifting techniques, vehicles are carefully removed without damage and transported to an approved location.

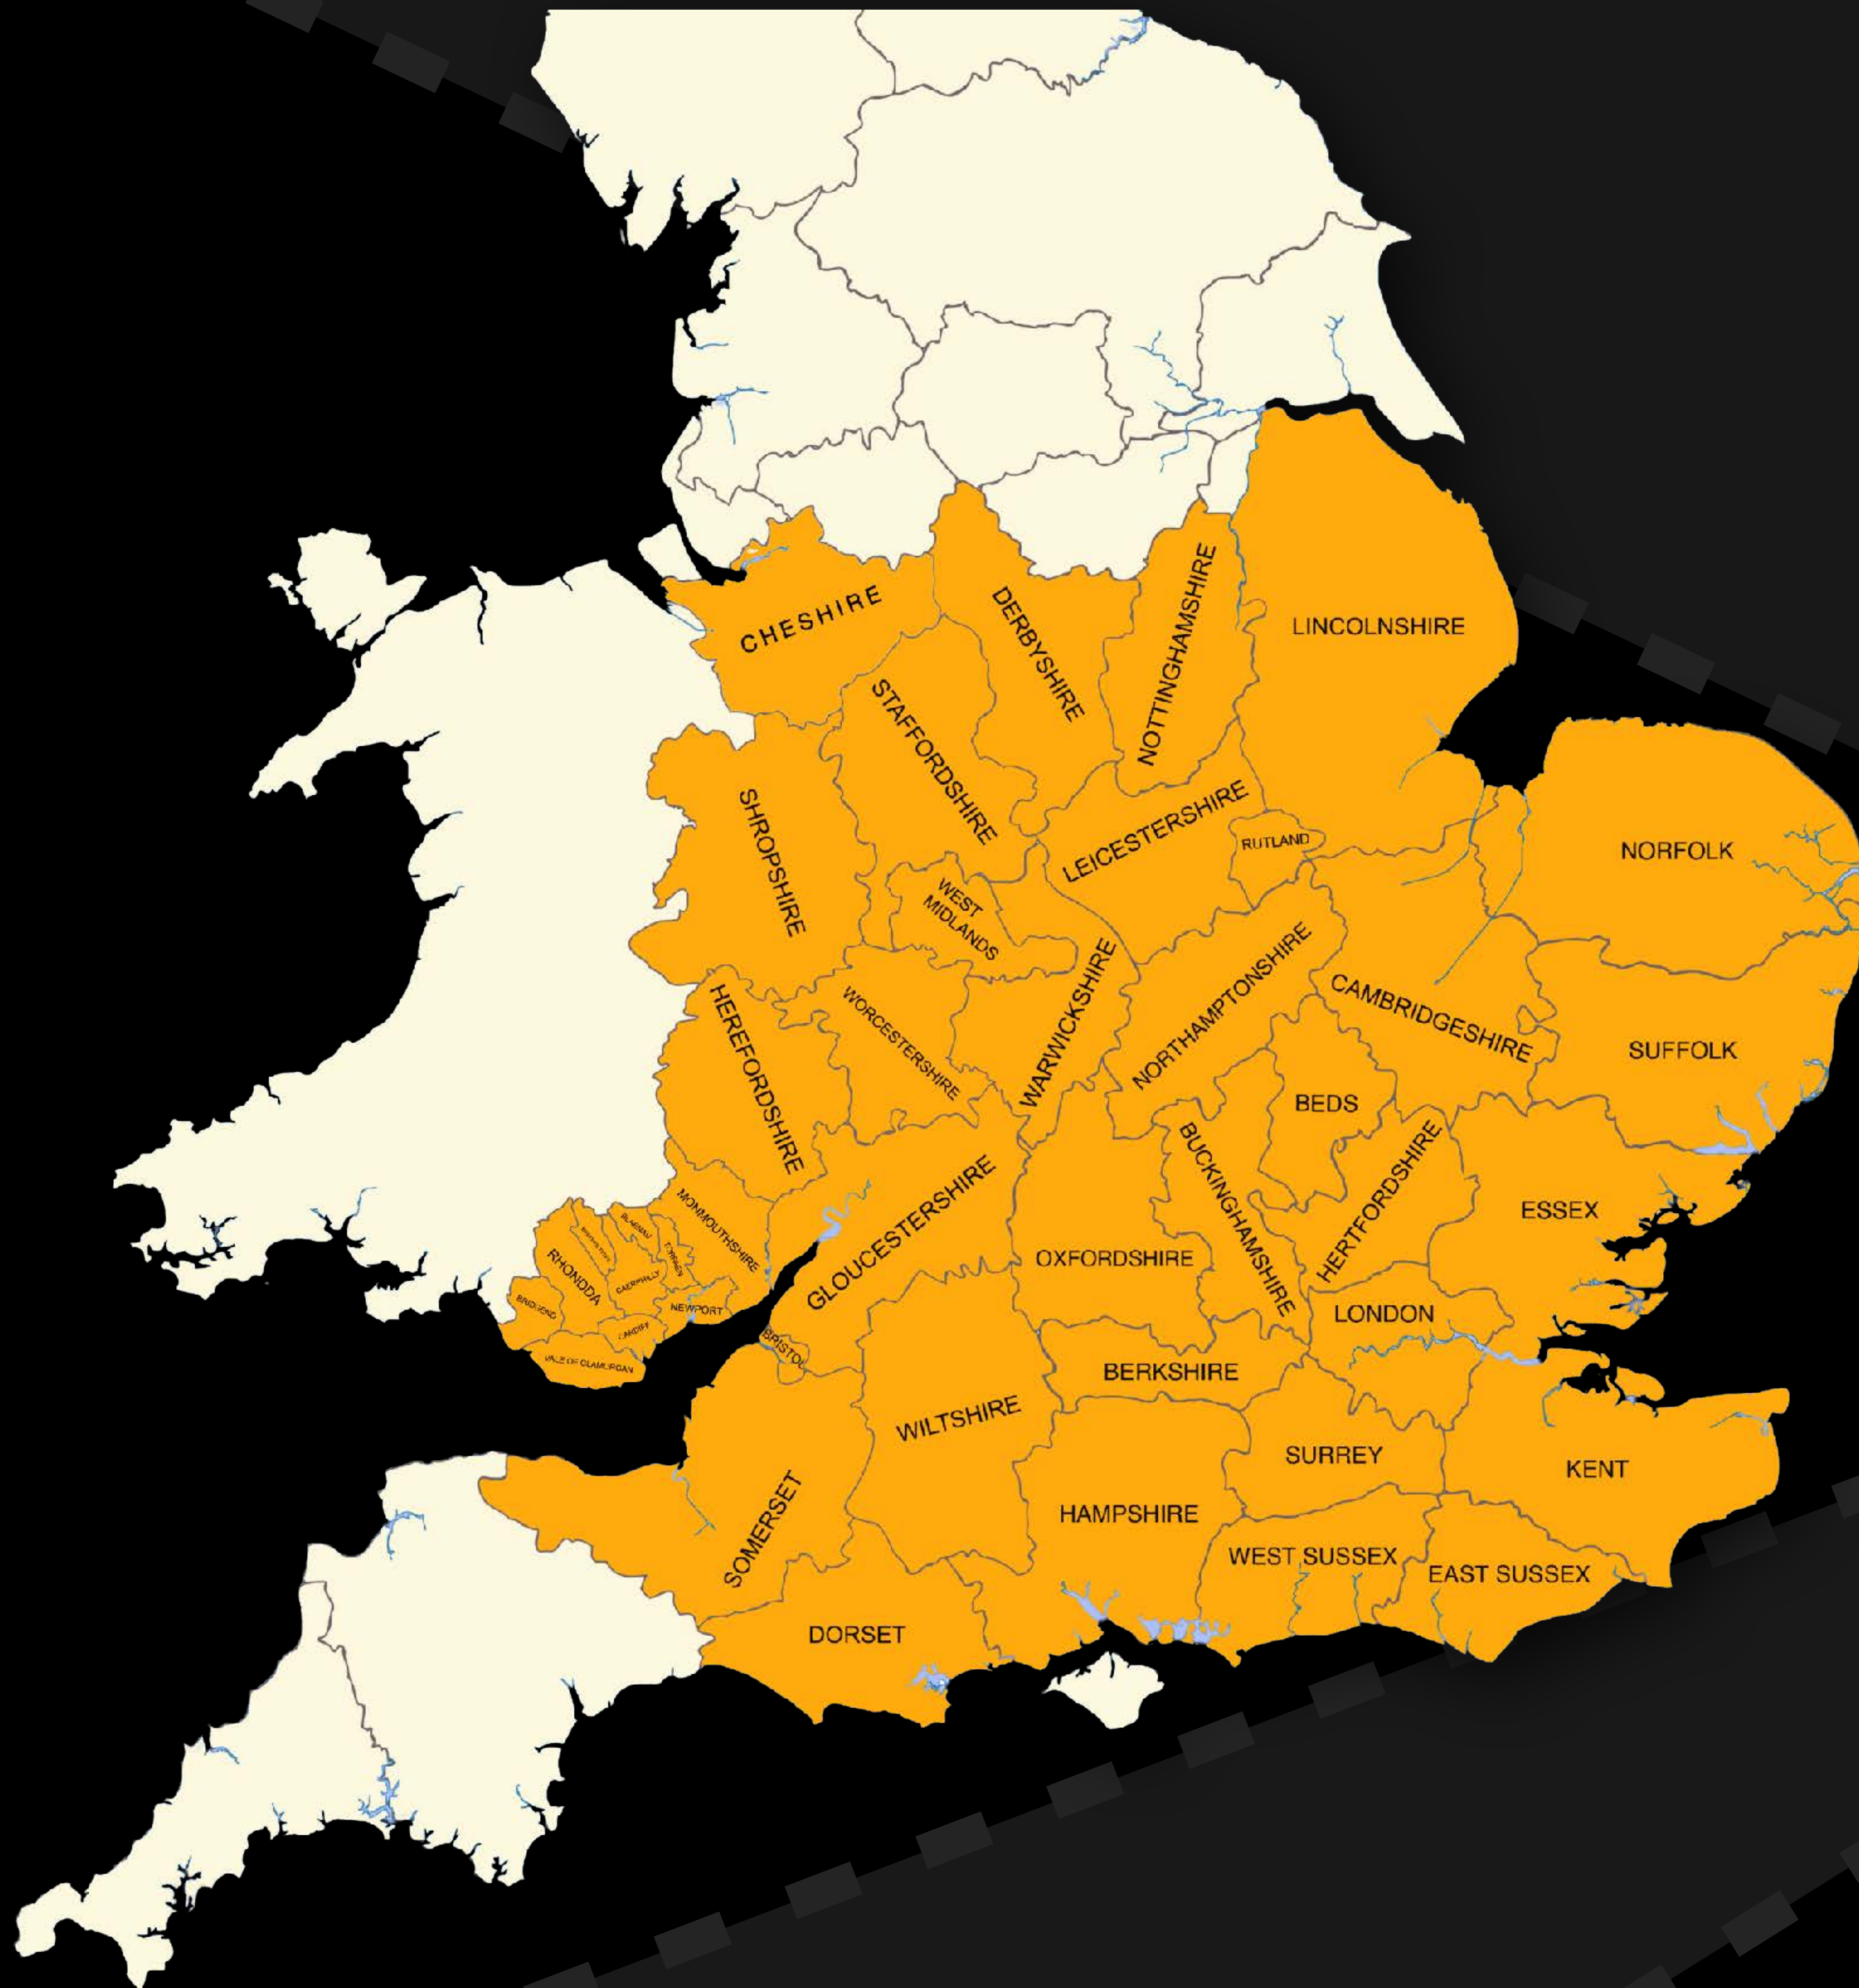

For complete transparency, we provide photographic evidence before and after removal, together with a detailed vehicle movement report for every operation.
